

PLAYCOATZ

Synthetic Rubber Playground System

PLAYCOATZ is a pour in place rubber resurfacing system that offers a durable and impact resistance base for playgrounds. There are 2 coating options available:

PLAYCOATZ PREMIUM SYSTEM:

- Landscape Filter Fabric
- 4 inch base of compacted stone for drainage
- Layer of recycled chunk rubber with urethane binder
- 1/2 inch cap of TPV Synthetic Rubber Granules (RUBBERCOATZ)

MULCHCOATZ SYSTEM:

- Landscape Filter Fabric
- 4 inch base of compacted stone for drainage
- Layer of solid color or variegated colored chunk rubber with urethane binder

ADVANTAGES:

- Non-invasive/fast return to service
- Superior UV Stability
- Low Maintenance
- Slip resistant
- Available in a vibrant array of colors
- Customizable color blends and designs
- Excellent freeze/thaw properties
- Impact resistant
- Flexible and soft

Both systems can be adjusted to the required thickness to comply with critical fall height requirements.

TECHNICAL INFORMATION:

TPV Rubber Granules are a premium, synthetic rubber formulated without the incorporation of Sulphur, clay fillers, heavy metals such as Zinc and Phthalate plasticizers. TPV will not leach out harmful sulphurs or peroxides into the environment and does not leach out color pigments or become brittle like others on the market. They are also UV stable and weather resistant and will not brittle with age.

We use the strongest aliphatic and aromatic urethanes on the market. Our urethane binders are 100% solids, single component moisture cure urethanes.
