

RUBBERCOATZ

Synthetic Rubber Granule Overlay System

RUBBERCOATZ is an affordable and attractive poured in place rubber resurfacing system that can be applied to a variety of substrates. This system uses the highest quality TPV rubber granules and binders available in the industry. This type of coating can be easily formed into different shapes and color combinations to match any themed area. RUBBERCOATZ is soft, flexible and the perfect upgrade to any surface while adding safety and longevity.

TYPICAL AREAS OF USE:

- Indoor and outdoor
- Pool decks and patios
- Walkways
- Outdoor play areas
- Indoor play areas
- Showrooms

ADVANTAGES:

- Non-invasive/fast return to service
- Superior UV Stability
- Low Maintenance
- Slip resistant
- Available in a vibrant array of colors
- Customizable color blends and designs
- Excellent freeze/thaw properties
- Impact resistant
- Flexible and soft

SPECIFICATION OVERVIEW:

RUBBERCOATZ Synthetic Rubber Overlay Systems, surface preparation, and detailed application instructions per manufacturer.

TECHNICAL INFORMATION:

TPV Rubber Granules are a premium, synthetic rubber formulated without the incorporation of Sulphur, clay fillers, heavy metals such as Zinc and Phthalate plasticizers. TPV will not leach out harmful sulphurs or peroxides into the environment and does not leach out color pigments or become brittle like others on the market. They are also UV stable and weather resistant and will not brittle with age.

We use the strongest aliphatic and aromatic urethanes on the market. Our urethane binders are 100% solids, single component moisture cure urethanes.
